

AmpF ℓ STR[®] Identifiler[®] Plus PCR Amplification Kit

AmpF ℓ STR[®] Identifiler[®] Plus PCR Amplification Kit - P/N 4427368

Developmental validation experiments were performed by Applied Biosystems to evaluate the performance of the AmpF ℓ STR[®] Identifiler[®] Plus PCR Amplification Kit. These experiments were performed according to the DNA Advisory Board (DAB) Quality Assurance Standards (October 1, 1998) and guidelines from the Scientific Working Group on DNA Analysis Methods (SWGDM, July 10, 2003). Results from these instrument-reagent system developmental validation studies have demonstrated the kit to be fit for purpose for Human Identification testing for databasing, casework, and paternity applications.

Each laboratory using the AmpF ℓ STR[®] Identifiler[®] Plus PCR Amplification Kit should perform appropriate validation studies.
