Part Number	Description	Volume	Storage Conditions
4415193	VetMAX™ Bluetongue Virus Controls	80 µL	-20 °C. <i>Do not store in a frost-free freezer.</i>

Note: Read the MSDS and follow the handling instructions. Wear appropriate protective eyewear, clothing, and gloves.

Product description

The VetMAX™ Bluetongue Virus Controls is a mixture of bluetongue virus (BTV) control RNA (1000 copies/µL) and Xeno™ RNA Control (1000 copies/µL) that serves as a positive control for amplification of BTV segment 1 RNA and Xeno RNA Control in multiplex real-time RT-PCR.

Use 8 µL of the VetMAX Bluetongue Virus Controls (equivalent to 8000 copies each of BTV control RNA and Xeno RNA Control) per 25-µL reaction.

Handling instructions

Use typical precautions against RNase contamination when handling the VetMAX Bluetongue Virus Controls. For example, wear clean gloves and use nuclease-free barrier pipet tips. Improper handling of the VetMAX Bluetongue Virus Controls can result in RNA degradation and failure of the positive control RT-PCR.

Safety information

Obtaining MSDSs

To obtain Material Safety Data Sheets (MSDSs) for any chemical product supplied by Applied Biosystems or Ambion:

- At www.appliedbiosystems.com, select **Support** ▶ **MSDS**. Search by chemical name, product name, product part number, or MSDS part number. Right-click to print or download the MSDS of interest.
- At www.ambion.com, go to the web catalog page for the product of interest. Select **MSDS**, then right-click to print or download.
- E-mail (MSDS_Inquiry_CCRM@appliedbiosystems.com), telephone (650-554-2756; USA), or fax (650-554-2252; USA) your request, specifying the catalog or part number(s) and the name of the product(s). The associated MSDSs will be e-mailed unless you request fax or postal delivery. Requests for postal delivery require 1 to 2 weeks for processing.

Note: For the MSDSs of chemicals not distributed by Applied Biosystems or Ambion, contact the chemical manufacturer.

For Research Use Only. Not for use in diagnostic procedures.
